

New accessories

VICTORIA PLUS SILENT

2" GAS with internal and external trapezoidal thread.
*Accessories not supplied.

► Victoria Plus Silent has a dual thread connection:

1. Outer thread the same as the Victoria Plus pump. This makes the pump easy to replace as the same end fittings from a Victoria pump can be used. Should any additional fittings be required, use the following codes: 68188 (1/2 - 3/4 - 1 CV), 67655 (1^{1/2} - 2 CV), 67655 + 68189 (3 CV).

2. Standard 2" BSP internal thread (GAS)

Standard end fittings in the market: 2 x 09033 (1/2 - 3/4 - 1 CV), 1 x 02358 + 1 x 02352 + 1 x 02092 (1^{1/2} - 2 CV), 1 x 02358 + 1 x 02352 + 1 x 02092 + 1 x 68189 (3 CV).

• Why aren't the end fittings for the Victoria Plus Silent pump included?

- A high proportion of replacement pumps sold do not need them.
- The pump is compatible with standard end fittings found in the market.

CODE	MOTOR	
	HP	VOLTAGE V
65557	1/2	230
65558		230 - 400
65560	3/4	230
